

GETTING DENTAL IMPLANTS CLOSER TO YOU

University of Toronto faculty of Dentistry from Canada and the Oral Implantology Research Institute, Dubai will Commemorate a Grand Opening in joint Oral Implant training in Knowledge Village, Dubai UAE on April 10th 2015.

The collaboration will focus of furthering Dental treatment and Research in the region and on training graduate Dentists in the Dental Implantology specialty. The Oral Implantology Research Institute in **Knowledge Village, Dubai** will provide comprehensive and prevention-oriented dental services to residents and visitors of the country.

Eligible Participants and partners of the project are people with incorrigible tooth loss as well as motivated doctors wanting to be trained in dental implants using the latest scientific methods and products in dental Implants.

The Faculty of Dentistry at the University of Toronto is the largest dental school in Canada. The Faculty is considered the leading dental faculty in Canada and is highly regarded throughout the world. The mission of the Faculty of Dentistry is to provide leadership and to strive for excellence in undergraduate, graduate, postgraduate and continuing dental education and in scholarly activities related to research and clinical care. The salient feature of this training program is an innovative package where all participants of the program come out as inevitable winners.

The Oral Implantology Research Institute in Knowledge Village, Dubai will begin seeing dental implant patients immediately after this grand opening and the first graduate's class of 2016 will begin their graduate training program in April 2015, continued in August and December and completed one year later in April 2016.

The grand opening will be attended by senior executives of both Institutions as well as senior government of the UAE Health Ministry.
